

UCLA Science Faculty Research Colloquium

Presented for fellow scientists and interested non-scientists, these colloquia are intended to promote interdisciplinary interaction in the campus research community, as well as with colleagues from other institutions and with the public.

2006-2007

Tuesday, November 28, 2006 (Physics & Astronomy 1425)

James Lake

Professor of Molecular, Cell & Developmental Biology
"Genome Beginnings"

Wednesday, January 17, 2007 (LaKretz 110)

Terence Tao

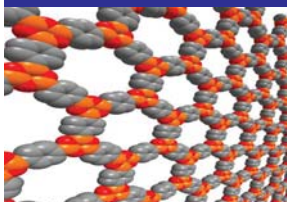

Professor of Mathematics
"Structure and Randomness in the Prime Numbers"

Tuesday, February 13, 2007 (Physics & Astronomy 1425)

Deborah Estrin

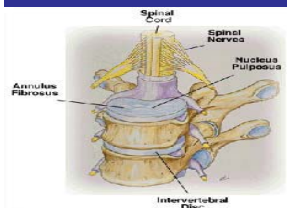

Professor of Computer Science
"Wireless Sensing Systems: From Eco-Systems to Human-Systems"

Tuesday, April 3, 2007 (Physics & Astronomy 1425)

Omar Yaghi

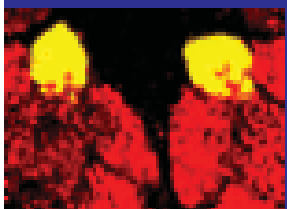

Professor of Chemistry & Biochemistry
"Crystals of Pores Without Walls for Clean Energy"

Tuesday, May 1, 2007 (Physics & Astronomy 1425)

V. Reggie Edgerton

Professor of Physiological Sciences
"Promising New Strategies to Regain Standing and Stepping Ability Following a Severe Spinal Cord Injury"

Tuesday, June 5, 2007 (Physics & Astronomy 1425)

Lawrence Zipursky

Chair of Biological Chemistry
Howard Hughes Medical Institute Investigator
"Molecular Diversity, Cell Recognition and Wiring the Brain"

Lecture begins at 4:00 pm, Reception begins at 5:15 pm
